PROJECTS	Student Analyzer Application – Academic Project (2026) - Designed and developed a desktop-based Student Analyzer application using Java, featuring a complete Graphical User Interface (GUI). - Implemented secure user authentication logic and strict data validation techniques to ensure application reliability. - Focused on creating a clean, responsive, and user-friendly interface, aligning with core UI/UX principles.
	Pharmacy Management System – Database Project – (2025) - Built a comprehensive management system using Microsoft Access to streamline pharmacy operations, inventory tracking, and sales reporting. - Designed and implemented a secure user login system to enforce access control, ensuring only authorized personnel can view sensitive system data. - Structured relational database tables, established entity-relationships, and created optimized queries with interactive forms. - Developed technical documentation and delivered a presentation explaining the system architecture to an academic panel.
	Car Service & Maintenance Platform – InnovEgypt Graduation Project (2026) - Developed a tech-driven platform concept designed to enhance transparency and trust in car maintenance through smart, data-driven insights. - Collaborated with a cross-functional team to build the initial prototype and user workflows. - Achievement: Awarded Grade A for project execution and presentation by TIEC & ITIDA.

EXPERIENCE	Laser Cutting Specialist & Graphic Designer (2023 – Present) 3 years of experience operating laser cutting machines for precise cutting and production of customized items and models. - Highly skilled in Adobe Illustrator (AI) for preparing, structuring, and editing vector design files for production and clean execution. - Contributed to creating and developing personalized products with strong attention to minute details and high quality standards.

EDUCATION	Higher Institute for Advanced Studies – El Haram
	Management Information Systems (MIS) Student
	Expected Graduation Year: 2028 - Consistently achieved outstanding evaluations in academic projects. - Strong interest in Software Development, Front-End Development, and UI/UX Design.

CERTIFICATES**Computer Science Fundamentals Diploma | Route Academy (2026)**

- Achievement: Recognized as a "Top Performer" for exceptional performance in programming fundamentals and core computer science concepts.

InnovEgypt Program Certificate | TIEC & ITIDA in collaboration with iSpark (2026)

- Achievement: Graduated with Grade A in Tech-Entrepreneurship and Innovation, with hands-on training in building tech solutions.

SKILLS

- **Programming Languages:** C++, Java • **Concepts:** OOP, Data Structures, Algorithms
- **Methodologies:** Agile, Unit Testing
- **Design & Cutting Tools:** Adobe Illustrator (Preparing and editing design files for production and laser cutting)
- **Database Basics:** SQL (Introduction level)
- **Soft Skills:** Problem Solving, Teamwork, Team Leadership, Adaptability.
- **Skills in Development:** Front-end (Learning/In progress).
